

ALMA MATER STUDIORUM
UNIVERSITÀ DI BOLOGNA

IRRMA-11

11th Topical Meeting on Industrial Radiation and Radioisotope Measurement Applications

Bologna (Italy), 23-28 July 2023

Chairs

Jorge E. Fernandez
Department of Industrial Engineering (DIN)
Alma Mater Studiorum University of Bologna
ITALY

William Dunn
Kansas State University
USA

Local Organizing Committee

Jorge Fernandez, , DIN, University of Bologna (Chair)
Giorgio Cucchi, ANPEQ
Gian Marco Grippo, ENEA
Lorenzo Isolan, DIN, University of Bologna
Maria Pia Morigi, DIFA, University of Bologna and INFN
Domiziano Mostacci, DIN, University of Bologna
Marco Sumini, DIN, University of Bologna
Francesco Teodori, DIN, University of Bologna

Technical Program Committee

David Bradley, University of Surrey, UK, Sunway University, Malaysia (Chair)
Mohammed Alkhorayef, King Saud University, Saudi Arabia
Burkhard Beckhoff, Physikalisch-Technische Bundesanstalt, Germany
Federico Boscherini, DIFA, University of Bologna, Italy
Christopher Chantler, University of Melbourne, Australia
Dudley Creagh, University of Canberra, Australia
William Dunn, Kansas State University, USA
Jorge E. Fernandez, University of Bologna, Italy
Richard Hugtenburg, University of Swansea, UK
Koen Janssens, University of Antwerp, Belgium
Marie-Christine Lepy, Laboratoire National Henri Becquerel, France
Walter McNeil, Kansas State University, USA
Ladislav Musilek, Technical University of Prague, Czech Republic
Francesc Salvat, University of Barcelona, Spain
Avnet Sood, Los Alamos National Laboratory, USA
Francesco Taccetti, INFN-Firenze e CHNet, Italy
James Tickner, Chrysos Corp, Australia
Hector R. Vega Carrillo, Universidad Autonoma de Zacatecas, Mexico

IRRMA11 Secretariat

email: irrma11@unibo.it

Selected contributions will be published in the scientific journal **Radiation Physics and Chemistry**

<https://irrma.ing.unibo.it>

Topics

- Material Testing and Non-destructive Techniques
- Contraband and Explosives Detection
- Nuclear Safeguards
- Radiation Applications in Medicine (Therapy and Diagnostics)
- Neutron Capture Therapy
- Prompt Gamma Applications
- Sources and Detectors
- Medical and Engineering Imaging Techniques
- Radioisotope production
- Modelling of Radiation Transport with Monte Carlo and Deterministic Methods
- Micro X-Ray Analysis
- Radiation Applications in Art and Archaeometry
- Radiation Applications to the Environment
- Dosimetry and Radiation Protection
- Emerging nuclear technologies
- Fundamental Parameters Initiative

Deadlines for Early Registration July 7th, 2023 and Abstract submission June 15th, 2023
